A Man Tries to Hang Himself in a A CONSTRUCTION TRAIN GOES THROUGH A BRIDGE. Stationhouse.

TWO ATTEMPTS AND NEITHER ONE SECCESSFUL.

A man who gave his name as J. C. Clemons, "of North Carolina, sir," was found yesterday morning by officer Bob Seay, on Lafayette street, either drunk or crazy-most probably both. He had been guilty of an aet so revolting and unmanly in nature that we cannot mention it here. He was taken to the First-street station

The keeper of the station went out in front of the house and sat down, thinking the fellow would, like most men, be very to tulk to. But in this he was mistaken. The keeper had hardly taken his accustomed chair on the sidewalk before the

Mr. Jones took the strips of linen from him, and, as a precautionary measure also his suspenders, and then placed him in a cage where there was nothing for him to hang from. He begged repeatedly to be given enough strychnine or laudanum with which to kill himself. He, of course, failed to find any one who was willing to help him commit murder, and he finally curled himself up in one corner of his age and became docile and quiet. RAILROAD ACCIDENT. CAUGHT AT LAST.

TWO MEN KILLED AND SIX INJURED.

On Saturday afternoon, at about four o'clock, while a construction train, going east, was passing over a bridge which spanned Bank Lick creek, twelve miles this side of Covington, the structure gave way. Both of these bridges will be at once removed and repaired with Finck's patent through truss iron bridges, which are universally admitted to be entirely safe.

The wrecked bridge was built by the Louisville Bridge and Iron Company, of this city, and was considered a safe structure. A great deal heavier trains than the one which went down have often passed over it without producing any evidences whatever of its weakness.

Its history is somewhat obscure. nor can we say whence the derivation of the name cricket. Formerly it was called "Handyne and Handonte," and some also assert that it is the same game once called "Club Ball." From the fourteenth eentury, however, to the present, it has been called Cricket. Although essentially ar English game, it is much played in Ireland, Scotland, all of the British colonies and the United States. Encouraged as i is, in the British army, among the English thank Mr. Jones for preserving his life, nobility, and the manufacturing classes of though it is no wonder he wished to die England, it is not surprising that the picked eleven of all England should defy the world. In 1859, however, America challenged all England, and, although de feated, gave our English cousins good sport and good eheer. It is the

democratic game of aristocracy. In it the nobleman and the laborer are one. It was the encouragement given to athletic games, and the temperance and chastity necessary to their successful conduct, that rendered the Spartans famous n history. cunning as any to be found in the country stantly coming to grief at their hands. They may be baffled for a time, but sooner or later every thief who visits Louisville is sure to become a victim to their energy and vigilance. In our Friday's issue we mentioned the

arrest by Detectives Tiller and Gilmore his name as John Adams, charged with stealing a horse. That charge was well founded. Detectives Tiller and Gilmere had been on the look-out for Adams, alias Rogers, for two or three days, having been informed in a satisfactory way that Adams had, on the first of June, stolen a horse from a gentleman named Philip Young, at Hamilton, Ohio, about twenty five miles from Cincinnati. He shipped the animal to this city on the steamer St. Charles. He arrived shortly after the horse did, and from that time up to Friday last had been having a pretty good time, no doubt trying his hand at his avocation hereabouts, at least in one instance, as we shall show. On last Friday morning Messrs. Tiller and Gilmore came up with Adams. Tiller, ascertaining where the horse was, proceeded at once to take the animal in charge, while Gilmore "went for" and, with the aid of Jim Coulter, who t will be remembered, had a desperate tussel with the rascal, caught the thief. He was lodged in jail in a jiffy. He re fused to give any information whatever having at least enough sense to keep hi own secrets. Tiller and Gilmore tele graphed to the gentleman mentioned above, at Hamilton, giving a description of the horse and thief. This morning Mr. Young and also the Deputy Marshal of Hamilton arrived in the city. A full description of the horse was given by Mr Young, and upon being shown the animal he identified him as his property. Mr. Young will remain in town until he can procure a requisition from the Governo of Ohio to take the thief back to Hamil ton, in custody of Mr. McGlynn, the Dep-

It now turns out that Adams is the thief who stole a valuable mare from Dr. Walling, on Portland avenue, on the night of June 19th. In this instance put the stolen animal doubt intending to ship the horse to some one in Ohio who was posted and would seep it for him. But Carter Tiller was fingers that time. He will not be likely to slip through anybody's fingers soon again.

Adams, or Rogers, is beyond doubt nember of a well organized gang of horse hieves, who "work" throughout Ohio and Kentucky, shipping their game each way, as occasion may require: and in the canture of Adams they have lost, no doubt, a 'useful and esteemed member" of their

The Grand Mowing Trial.

To the Editors of the Evening Express. The sight of fifteen first-class mowing

machines, all starting at a given signal, and each cutting un acre of heavy, lodged clover and grass within an hour, on the afternoon of Friday last, was a spectacle which will be long remembered by those 1000 00 who witnessed it. But it has occurred to 150 00 ns that, in a trial so important to the furming community, as well as to the manufacturers of the various excellent machines represented, it must be a very embarrassing position for the judges to be required to say, upon so slight a test, which one of all the fifteen mowers is the best. Indeed, we understand that the gen-1100 00 tlemen who, as we think, have been so judiciously selected to make the award, have found it necessary to defer the decision, ecause of the difficulties referred to.

As one who feels a deep general interest everything that tends to develop the in-Instrial resources of our country, we deire to make to the judges and representaives of the various machines, the followng suggestion: that, in case they (the udges) find it difficult to decide from the data before them which machine is entiled to the premium, they designate such nowers as seem to them the best, and anpoint a time and place which will accomof such machines and subject them to any ments. arther test they muy deem necessary. The Johnson Self-raking Reaper. We alluded last week to this really valu

able labor-saving invention. It fully sustained itself in trial, cutting the very heaviest of wet grain, both lodged and enning, without a single choke and with ease to the team. The method of construction is such that you can make the sheaves any desired size, thus adapting it to heavy or light grain, and making the oundles uniform, also adjusting the hight of cut whilst the team is in motion. There s nothing about it complicated or calculated to get out of repair, and its construction is so simple that any ordinary farmer can put it together and use it. Mr. Johnpriate to the occasion. son has been really a benefactor to the farming community, and all who have used nis "self-raker" are unanimons in award ng it the name of a truly labor-saving machine. He has added another candidate for public favor in the shape of a new and complete single mower, called the "Cycloip." This machine is presentthe "Cycloid." He was alone in its management and rested the machine entirely on its own merits. It cut in the very henviest wet lodged grass without choking, and was stopped ut pleasure without backing. It was the only machine that did not at some time choke. A gentleman from the interior who has been a dealer in machines for years se-lected this machine as the best single mower on trial. The gearing is on a new and improved plan. The peculiarity of the cycloid movement of the gearing renders it comparitively noiseless and gives a strong motion to the sickles, with very light draft to the team, and at the same time dispenses with shufting and unnecessary friction from the wear of boxes. THE OCEAN BANK ROBBERY. Fully \$200,000 Still Missing.

From the N. Y. Herald, 2d. No new revelations in the Ocean Bank bery were made yesterday calculated

In addition to the \$268,000 recovered by the police, it is known that fully \$200,000 are still unaccounted for by persons who ave made their losses known. A numer of sufferers who had deposits in the nstitution have carefully abstained from eporting the amount to the bank, and consequently the exact value of the property carried off cannot be stated, but i will not likely fall short of half a million In the newspapers of yesterday advertise ments appeared offering rewards of twenty-five per cent. for four different lots of securities, amounting in the aggregate to \$135,000. It is understood that \$75,000 of pacconist; \$15,000 by Harrison Reed, and \$25,000 by a gentleman of wealth, who has taken care to keep his name from the pub-lic in the transactions of the bank. The statement having been made that the Irving National Bank was a heavy sufferer, the officers have published a denial of any

The Board of Directors of the bank have offered a reward of twenty-five thousand dollars for the arrest of the guilty parties. As they profess to have suffered to the extent of from twenty to twentyfive thousand dollars only, this liberal reward has excited considerable comment and is generally looked upon as indicating that either the bank has sustained losses that the officers have feared to divulge, or, being very sure that they will never be called upon to pay the amount offered. they put forth the card to impress the ublic with their sympathy for depositors.

THE RETCHUM CASE.

Strange Developments. From the N. Y. Express, Friday.

In the Ketchum case this morning Mr Phelps said he did not appear for the uncle of the prisoner or for his father, who was the power behind the throne. He appeared for Edward B. Ketchum, at his request. Standing where he would stand, were it possible for him, speaking as he would speak, only with less feeling, he asked the court to regard the proceed-man, and well posted in the doings of the in, as null and void and to discharge the writ. He, the prisoner, was satisfied with his sentence, and thought his punishment was just and merited. He was unwilling without a doubt, and another name is adto avail of a technicality to obtain his re-lease. The father of the prisoner, as was well known, had given all his attention company B, First Illinois artillery, for since the conviction of his son in trying to obtain the exercise of ex-ecutive clemency in his behalf, and petitions had been presented to the former as well as to the present Governor of the State, signed by some of the most exalted and influential men in the counasking for the prisoner's pardon His efforts, however, were not successful. Two years ago he was advised by eminent counsel that his son had been illegally sentenced, but he then thought that the clined to avail himself of a technicality. But now the father believed that his erring but repentant son had been sufficiently punished. He knew him to be suffering from a disease that threatened his life, and hence these proceedings. The son, nowever, on his part was determined not to owe his release to a technicality, and he (counsel) therefore moved to have the proceedings quashed.

AN EARTHQUAKE.

Vibrations Felt for Miles.

From the St. Louis Democrat, 2d. On Friday morning, between 1 and o'clock, many citizens of the city and county were awakened by the shocks of an earthquake. At Kirkwood there was a pretty general awakening. Mr. John H. Tice, at Cheltenham, states that he was people would not be satisfied, and he awake at the time, and heard a faint rumbling noise which he supposed proceeded from an approaching railroad train, but immediately felt the bed vibrating and the windows rattling; that there were three distinct waves, the second the heaviest, which jarred the windows not unlike the jarring of street cars from maadamizing obstructions on the track.

Observations of the phenomenon come o us from points many miles apart, showing that the range of the shock was quite extensive. It was sensibly felt at Alton, and from points south of that at least fifty miles distant From conversations with various gentlemen, we think the greatest force of the vibration was in St. Louis and the district immediately adjacent on the southwest. Its time is quite definitely fixed by different parties. General N. Ranney places it at nine minutes after 12 A. M., and the movement lasted five seconds, the vibrations being north and south. An intelligent gentleman, who resides on the plateau just east of Cote Brilliaut, was awakened, with his family. y a rough shaking of the house, and his first idea was that a hurricane was rag ing without. His watch denoted fificen minutes past two, with a duration of six seconds. The first shock was the heaviest, immediately followed by another more In many localities articles of furniture were moved and small orna-ments thrown down, but, as far as we know, little damage resulted.

A CURIOUS BLUNDER.

A singular occurrence, and oue that was the cause of great loss to unfortunate backers, occurred in the Windsor Handi cap on Wednesday. For this event four teen came to the post, and of these Pau Janes was made favorite at 5 to 2, whil Alpenstock was next in demand at 3 to 1 considerable delay occurred at the post and there were several breaks away; at length the advanced starter, misunder standing some signal from the rear starter, Mr. McGeorge, lowered his flag. The majority of the jockeys took this to indi cate a start and proceeded at once on their ourney, Alpenstock, who was first off, making the whole of the running. Only two of the jockeys, Butler and Burrell, riding respectively Distuff and Honoria, per ceived the true state of affairs and re-mained at the post, and Kenyon, on Skipjack, who of the others was st off, after going some distance, king over his shoulder, saw that some hing was wrong and returned. A seen of the wildest confusion prevailed, owners of those that actually went off rush now in this city on his way to LaSalle, his home. All of Major Powell's baggage together with the carpet-bag found by Ris ug out ou the course to endeavor to stop them, but all was of no avail, and on the went. It was not until they were within a quarter of a mile of home that they, too erceived the error, and most pulled up ut Jeffery, on Alpenstock, who was lead ng, rode out his horse and won. Captair Machell, on behalf of the owner, Royston, made the jockey weigh in as a precautionary measure; but the steward lecided that the race should be run over again. Then there was a terrific rush or the part of those who had backed Pan nes to "get ont," and Alpenstock, who had won so easily, was at once made the favorite, at 2 to 1. The eleverest men in however, invested on Skipjack who had all the while been quietly waiting at the post, and they were right; for he won easily enough. The scene that took place during these proceedings was one of the most curious ever seen on a race course; the excitement was tremendous

Ever Offered to the Public.

This highly concentrated extract is arefully made by displa use of heat, from the best Buchu leaves, comblued with Pareira Brava, Juniper Berries and Cubebs, and is offered to the public as a safe, sure and speedy cure for all derangements of the bladder, kldneys, &c.

The common method of extracting the

properties of medicinal herbs, roots, &c., by heat, is now known in many cases to injure, if not entirely destroy, their efficacy. By careful displacement with the proper menstruum, I have avoided this error, and have here provided an extract so concentrated that the dose, though small, contains more of the properties and virtues of the drugs than other preparations of the same kind on the market. It contains all the virtues of the fresh Buchu leaves greatly increased in its efficacy by being combined with the other ingredlents in such a way as to add greatly to its curative powers.

Its good effects are immediate, and the patient is encouraged to persist in its use in chronic cases untll a cure is effected.

On the Sunday follow ing her arrival at that hotel, one Frank Shaffer, who has been neting porter to and dumb female under his protecting wing and endeavor to make her time pass ngreeably. Subsequent facts go to prove however, that while the couple lingered neath the shades of that beautiful local ty, they were not us silent as the silen Thursday last she went down the street, in company with a little girl, to purchase some goods. On her way she either intentionally or otherwise spok the little girl, who was much nlarmed she had never been lacking the gift of speech. The woman and the porter left yesterday morning on the 10 o clock stain west. They were married before they went, and intended to go to Michigan, huy a farm and settle down upon it. Before they left she handed her newly-made protector a large sum of mo ney, and seemed to have plenty beside The woman's name was Emeline Sheppare -now Equeline Shaffer. Her appearant was prepossessing, her manners ensy an graceful, and well calculated to work upor strangers' pocketbooks. When churge with being an impostor, she pleasantly said she land never asked anybody to give her anything-that she had merely pre-sented herself and made signs, and if such actions had put money in her pockets, why, she wasn t to be blamed.

LOZENCES!

-THE-

Most Reliable Vermifuge

EVER OFFERED TO THE PUBLIC.

Compounded of Purely Vegetable Ingrecients.

ENTIRELY HARMLESS.

Safe for Children of any Age.

NEVER FAILS TO EFFECTUALLY

Since the discovery of Santonin, the taste less, active principle of the European Wormseed (Semen Contra) its consumption has wonderfully increased. The seed in substance has been long and favorably known as a vernifuge, but its unpleasant taste and odor, and the bulk of the dose, have interfered with its use in this country. At this time the Sautonin, on account of its being tasteless, and a reliable vermifuge, is fast dis-

Almost ail of the popular worm postrums of the day depend for their efficacy upon the the physicians, and often hazardous in their

My purpose is to present to the medical profession this valuable medicine in a simpie, reliable and agreeable form, in determjued quantities and of uniform composition To accomplish this, I have prepared these lozenges with great care, of Santonin of tested purity, very carefully distributed throughout

the mass from which the Lozenges are formed The materials have been so compounded that the Lozenges will stand unaltered by time or climate. The boxes are also impervious to molsture from the atmosphere.

To give the Santonin time for full effect upon the worms, the addition of any purgative medicine to the Lozenges has been avoided. It may, therefore, be proper, two or three hours after the administration of the second dose, to use some simple purgative for the purpose only of discharging the worms.

These Lozeuges contain only pure Sugar and pure Santonin. The only merit I ciaim is the ascertained purity of the ingredieuts, and tts thorough and careful distribution, so that each Lozenge contains its exact portion of Santonin; the dose sufficiently indicating the quantity. C. H. WINTERSMITH.
